ELECTION

RESPONSE TO RESTRICTION REQUIREMENT

Responsive to the action mailed May 3, 2001, applicant elects the invention of Group I, claims 1-3 and 5-18, and SEQ ID NO:1. The election is made with traverse, because applicant is entitled to have "a reasonable number of such nucleotide sequences to be claimed in a single application" (MPEP 803.04).

As noted in the MPEP, "in *most* cases, up to ten independent and distinct nucleotide sequences will be examined in a single application without restriction" (MPEP 803.04; emphasis added). Here applicant recites only three sequences. Moreover, the MPEP notes that it is only in the "exceptional case" that less than ten sequences will need to be selected (MPEP 803.04). Furthermore, the MPEP points out "[i]f the search and examination of an entire application can be made without serious burden, the examiner must examine it on the merits, *even though it includes claims to independent or distinct inventions*" (MPEP 803; emphasis added). In addition, in the present case, SEQ ID NOs:1, 3, and 9 are related in that they represent the nucleotide sequences of homologous *Ls* genes in different plants. Accordingly, reconsideration and modification of this restriction requirement, as outlined above, is respectfully requested.

In addition, applicants note that the Examiner has apparently overlooked original claims 19 to 22. Applicant believes that the Examiner reviewed the claims in the certified translation of

the parent German application, which contains a total of 18 claims rather than the 22 claims in the U.S. application filed on October 15, 1999. In view of the dependent nature of claims 19 to 22, and their relationship to claims 17 and 18 in the translation of the parent application, applicant believes that they are properly included with the claims in Group I.
